

2012 International Conference on Advanced Mechatronic Systems Tokyo, Japan, September 18-22, 2012

Sponsored by the International Journal of Advanced Mechatronic Systems
Tokyo University of Agriculture and Technology
International Journal of Modelling, Identification and Control
The Institute of Complex Medical Engineering
Cooperated by The Japan Society of Mechanical Engineers
The Society of Instrument and Control Engineers
The Institute of Systems, Control and Information Engineers

Special Session on: "The application of the theories and methods of nonlinear analysis in the control of science and technology"

The theory and methods of nonlinear analysis is an important research area in modern mathematics. It has gradually gained a great deal of attention of mathematicians and many engineering and technical experts. This special session focus on the application of the theories and methods of nonlinear analysis in the control of science and technology, and, this theories and methods of modeling complex systems.

Session Organiser by

Professor Wanli YANG and Haiyun Zhou

Institute of Nonlinear Science, No.19,DuJiakan, Fengtai District, Beijing,China.
