

Mental Health Counseling Service

We have psychiatrists and psychologists who can help students and staff at Tokyo University of Agriculture and Technology continue their academic and personal lives with a healthy state of mind. Counseling services are free of charge. One session is about 50 minutes. If you need some medicine, you will be introduced to a hospital. Please come to or call to our reception to make your appointment.

※As our counselors are all Japanese, we can't speak English well. If possible, please come to counseling with an interpreter.
