

What is Ad hoc Network ?

➤ Network consisting only of mobile nodes

Even if there is no Base Station , anyone, anytime, anywhere, can communicate !!

☐ Merit

- ✓ No infrastructure equipment , for example Base Station , is required.

☐ Demerit

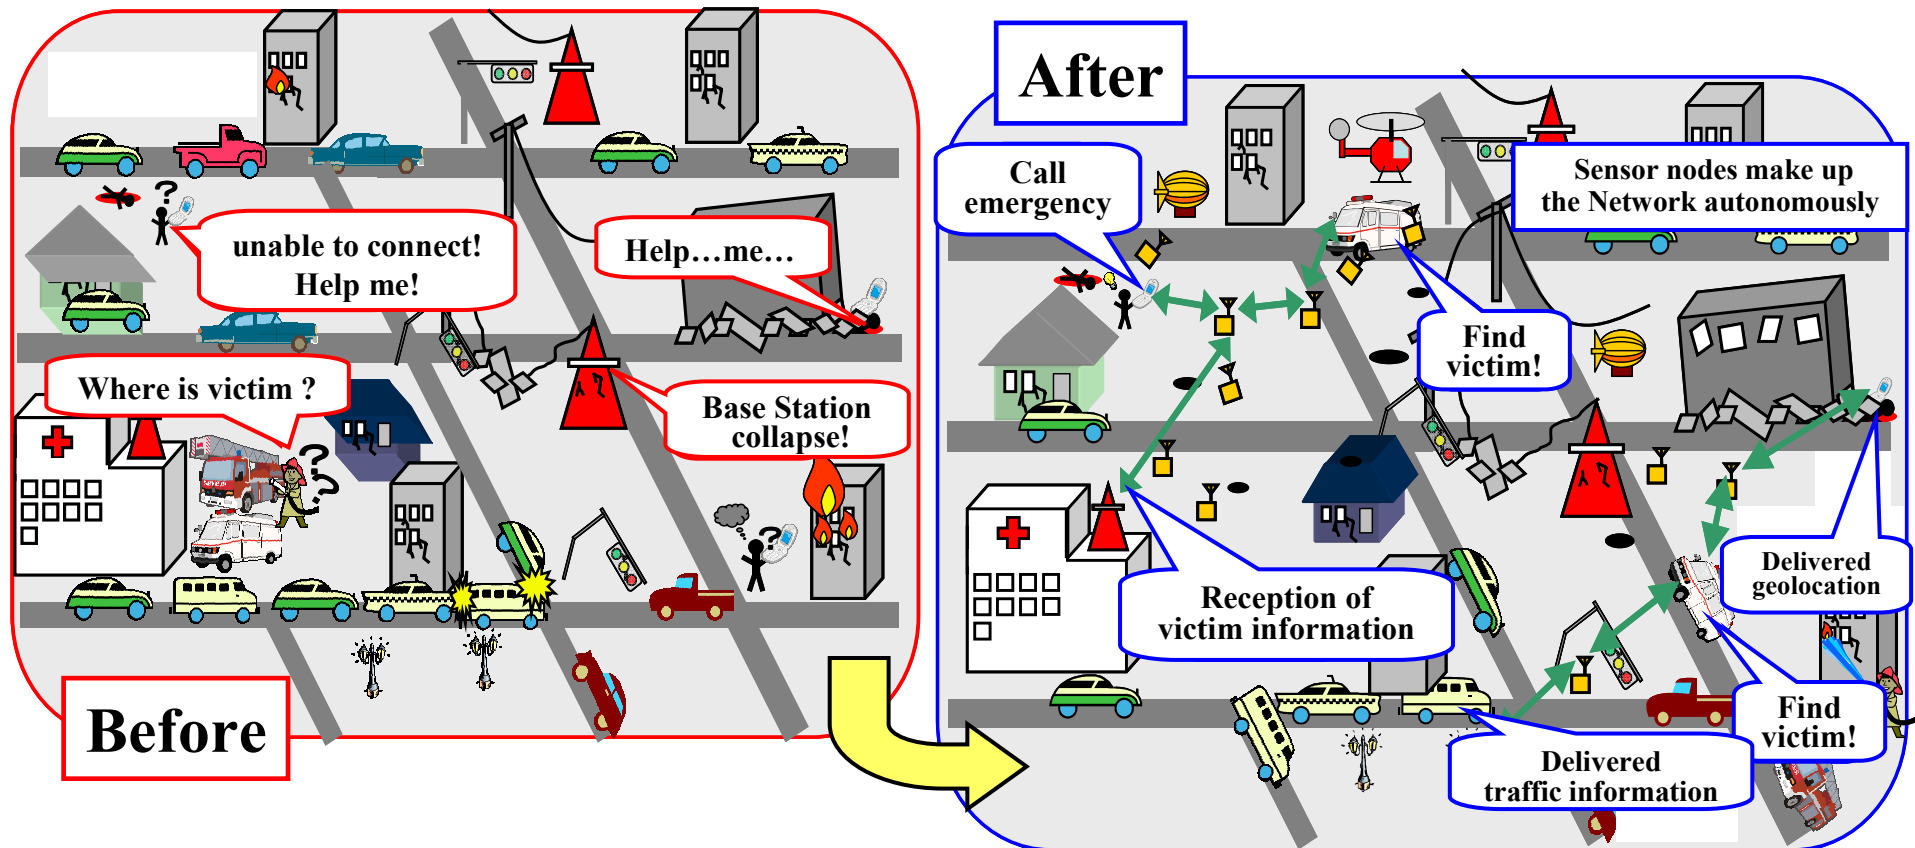

- ✓ There is no control station.
- ✓ Each mobile node needs autonomous distributed control because information is distributed.

Practical applications of Ad hoc Network

❑ At the time of disaster, Base Station is collapse....

✓ Big earthquake occurrence

✓ Network consisting only of mobile nodes autonomously
