

Graduate School of  
Bio-Applications and Systems Engineering (BASE),  
Tokyo University of Agriculture and Technology

Doctoral Cooperative Major in Advanced Health Science  
(Doctor)

## Application Forms and Guide

For students starting April 2026

Tokyo University of Agriculture and Technology

◎Cooperative Major in Advanced Health Science (doctoral) is a three-year doctoral course of Tokyo University of Agriculture and Technology, as a joint department with Waseda University.

## **1. What is a graduate school collaborative curriculum?**

A graduate school collaborative curriculum is a program jointly organized by more than one university, irrespective of whether they are national, public, or private universities, that makes effective use of the educational and research resources of the other university or universities, with the aim of further promoting the expansion and enhancement of the educational, research, and social action functions of institutions of higher education through mutual close coordination and cooperation.

## **2. Main characteristics of the joint department**

(1) The degree is granted jointly by the Tokyo University of Agriculture and Technology and Waseda University.

(2) Students are enrolled at both the Tokyo University of Agriculture and Technology and Waseda University. However, their main universities of registration are the universities to which their primary supervisor belongs. (For further details, please refer to 3. (2) on page 2.

(3) As students are enrolled at both universities, they are allowed to use the facilities of both universities (except for some facilities that are not available for reasons determined by the respective university).

(4) When your main university of registration is the Tokyo University of Agriculture and Technology, you can receive individualized guidance for your research also from a faculty member of Waseda University (your secondary supervisor).

(5) Students can attend lectures provided by the joint department at both universities.

Emphasizing a productive fusion of disciplines as a graduate school collaborative curriculum, the joint department readily accepts students not only from Japan but also from many different parts of the world, irrespective of educational, academic, and other backgrounds.

The Cooperative Major in Advanced Health Science is interested in having the following types of students:

- Those who have completed a master's program or six-year undergraduate program and who desire more advanced educational and research opportunities
- Those who have been granted a master's degree from an overseas university and who wish to obtain a doctoral degree from a graduate school in Japan

- Those who would like to explore advanced health science through education that integrates science, engineering, and agriculture
- Those aiming to become a leader in related fields such as pharmaceuticals, food, and the environment
- Those who are planning to become engaged in research, development, planning, and other such duties in corporations, public research institutes, public offices, educational institutions, or other organizations, who have a mission to contribute to maintaining and enhancing public health

### **3. Important information**

#### **(1) Contacting your prospective primary supervisor (essential)**

Be sure to contact the faculty member who you have chosen to be your primary supervisor prior to submitting your application (including application for approval of admission eligibility), and make sure that you have an accurate understanding of the relevant details, including the research activities you will be asked to undertake and the date of your academic achievement test.

Accepted applicants will then be required to contact their prospective primary supervisors to discuss their future research plans and other details.

#### **(2) Submission of applications, attendance at entrance examinations, and registration at your main university of registration**

If your prospective primary supervisor belongs to the Tokyo University of Agriculture and Technology, you will need to submit your application to, and attend your entrance examinations at, this university.

When this is the case, your main university of registration will be the Tokyo University of Agriculture and Technology, and payment of your tuition and other fees, scholarship applications, and other such procedures will be handled in the same manner as those of a student of the Tokyo University of Agriculture and Technology.

\* Applicants for admission to the Cooperative Major in Advanced Health Science are not permitted to apply to both the Tokyo University of Agriculture and Technology and Waseda University.

Cooperative Major in Advanced Health Science (doctoral), Graduate School of Bio-Applications and Systems Engineering, Tokyo University of Agriculture and Technology

## **Application requirements for students starting in April 2026**

The Cooperative Major in Advanced Health Science (doctoral) was established in April 2010 in the Graduate School of Bio-Applications and Systems Engineering, Tokyo University of Agriculture and Technology, as a joint department with Waseda University. For more information about the department, including an outline of the department and details of full-time professors, please refer to the pamphlet entitled “Tokyo University of Agriculture and Technology/Waseda University Graduate School Collaborative Education Curriculum: Cooperative Major in Advanced Health Science” or the Cooperative Major in Advanced Health Science website.

(URL: <http://www.tuat.ac.jp/~tw-kyodo/index.html>)

### **1. Student Quota**

Major : Collaborative Major in Advanced Health Science

Student quota : 6

### **2. Application Eligibility**

Students with any of the following qualifications are eligible to apply for admission:

- (1) Have, or expect to be granted by the end of March 2026, a master's degree or professional degree
- (2) Have, or expect to be granted by the end of March 2026, an overseas degree that is equivalent to a master's degree or professional degree
- (3) Have enrolled in course subjects delivered by an overseas school through correspondence education in Japan and have been granted, or expect to be granted by the end of March 2026, a degree that is equivalent to a master's degree or professional degree
- (4) Have completed an educational curriculum provided by an educational institution recognized as providing graduate curriculums as part of the school education system of an overseas country that is separately approved by the Minister of Education, Culture, Sports, Science and Technology of Japan, and have been granted a degree that is equivalent to a master's degree or professional degree from this institution
- (5) Hold or are expecting to obtain a Master degree or equivalent by March 2026, through course completion at the United Nations University (hereinafter referred to as UNU) as prescribed in Article 1 (2) of the Act on Special Measures Incidental to Enforcement of the Agreement between the United Nations and Japan regarding the Headquarters of the United Nations University (Act No. 72 of 1976), which was established under the December 11, 1972 resolution of the General Assembly of the United Nations

(6) Those who have completed an education course at a foreign school (at educational institutions that have been designated as qualifying for admission), (4) or those who have attended the United Nations University and passed an examination that is equivalent to the Examination of Doctoral Thesis Study Basic Ability, or those who are expected to pass the examination and are recognized as having academic ability that is considered equal to or greater than that of an applicant who holds a master's degree shall be deemed qualified.

(7) Students approved by the Minister of Education, Culture, Sports, Science and Technology

①Have graduated from university, have been engaged in research for at least two years in a university, research institute, or equivalent and are recognized, according to the results of their research or undertakings, as having academic ability that is equivalent to or exceeds that of those holding a master's or professional degree

②Have completed 16 years of school curriculums overseas or 16 years of course curriculums provided by overseas schools through correspondence education in Japan, have been engaged in research for at least two years in a university, research institute, or equivalent and are recognized, according to the results of the research or undertakings, as having academic ability that is equivalent to or exceeds that of those holding a degree that is equivalent to a master's or professional degree

(8) Are recognized as having academic ability that is equivalent to or exceeds that of those with a master's or professional degree through a separate examination of admission qualifications and have reached 24 years of age by April 1, 2026

Note: Students to whom (7) or (8) of the above qualifications applies are required to undertake an examination of application eligibility (prior examination). (Please refer to page 12, "Approval of application qualifications (7) and (8).")

Having completed (or expecting to complete) a six-year undergraduate program or equivalent in the field of medicine, dentistry, pharmacy or veterinary medicine alone is not sufficient for recognition as having academic ability that is equivalent to or exceeds that of those with a master's degree. Please note that applicants who only meet this requirement (having completed the above program or equivalent) are required to undertake an examination of application eligibility (prior examination).

### **3. Application Period**

Tuesday, January 13 –Thursday, January 15, 2026

Reception opening hours: 9:30 a.m. – 11:30 a.m., 1:30 p.m. – 4:00 p.m.

Your application must be submitted in person or by post. Applications submitted by post must be sent by registered express mail and arrive no later than Thursday, January 15, 2026

## 4. Application Procedure

(1) If applying for the general entrance examinations, please refer to page 5, “6. General Entrance Examinations (1) Application and other documents” and prepare the prescribed application and other necessary documents.

(2) If submitting your application in person, please visit the Admissions Section, Koganei Student If you submit your application by post, write “Enclosing application documents for the joint department” on the address side of the envelope in red, and send it to the Admissions Section, Koganei Student Support Office by registered express mail. Only application documents that arrive no later than Thursday, January 15, 2026 will be accepted.

## 5. Where to submit your application and find out further information:

Admissions Section, Koganei Student Support Office, Tokyo University of Agriculture and Technology

1F, Administration Building, Koganei Campus, Tokyo University of Agriculture and Technology

2-24-16, Naka-cho, Koganei-shi, Tokyo 184-8588

Tel: +81-42-388-7014 (direct line)

## 6. General Entrance Examinations

Selection of the Standard selection involves a combination of academic achievement testing and document screening.

### (1) Application and other documents

Application documents		Notes
A	Application for Admission (prescribed form)	Make sure that the “Primary supervisor of your choice” column is filled in. If you choose a supervisor with the * 1 mark (P10-), consult with a supervisor in advance.
B	ID Photo Card/ Examination Admission Card (prescribed forms)	An identification photo of the applicant with the head uncovered (4 cm high × 3 cm wide) must be pasted onto each of the ID Photo Card/Examination Admission Card forms.
C	Certificate of (expected) Completion	Submit your certificate of (expected) completion of a master’s degree issued by your graduate school. Those who satisfy application qualification (7) or (8) are exempted from this requirement.
D	Transcript	Submit a transcript issued by your graduate school. Those who satisfy application qualification (7) or (8) are exempted from this requirement.

E	List of research achievements (prescribed form) and separate related sheets	Draw up and submit a list of your past research achievements (academic papers, research presentations, reports, patents, etc.). Where possible, the list should be accompanied by separate sheets related to your achievements or copies of these. Those who satisfy application qualification (7) or (8) are exempted from this requirement.
F	Outline of Master's Thesis (prescribed form)	If you have completed a master's degree or are currently in graduate school, you are required to submit a summary of your master's thesis of up to 2,000 Japanese characters (or 500 English words). If you have separate sheets related to your master's thesis or copies thereof, attach these as well. Those who satisfy application qualification (7) or (8) are exempted from this requirement.
G	Research Plan (prescribed form)	Submit a summary of your research plan for the doctoral curriculum of up to 2,000 Japanese characters (or 500 English words).
H	Reasons for Application (prescribed form)	Develop a summary of your reasons for application of up to 2,000 Japanese characters (or 500 English words). Those who satisfy application qualification (7) or (8) are exempted from this requirement.
I	A copy of the certificate of residence (Original copy)	1) Non-Japanese applicants are required to submit a copy of the certificate of residence (Nationality, Visa status, duration time, and the expiry date of visa must be mentioned) or a copy of their passport. 2) Government-sponsored international students are required to submit a Certificate of Minister of Education, Culture, Sports, Science and Technology(MEXT) Scholarship Student.
J	Entrance examination fee	Transfer 30,000 yen to the following account. <b>MUFG Bank, LTD. HEAD OFFICE</b> <b>7851722 (Savings Account)</b> <b>Tokyo University of Agriculture and Technology</b> Next, paste the certificate of payment or the receipt onto the Confirmation of Entrance Examination Fee Payment form and submit it to the department. *Please add "BASEC" to the beginning of the payee's name. e.g. BASEC John Smith * Students in master's course of Tokyo University of Agriculture and Technology who are continuing on their studies in the university and Minister of Education, Culture, Sports, Science and Technology(MEXT) Scholarship Student are exempted from paying this fee. * When transferring money from outside Japan, please contact the Admissions Section.

K	Return envelope (Applicable only if you submit the application by post.)	Use Japanese Envelope Chou #3 and adhere 460 yen worth of stamps. Also ensure to provide your name, return address and postal code so we can send you your examination voucher and other documents. If you don't receive documents until January 30, please contact Admissions Section, Koganei Student Support Office.
L	Contact Information Stickers (prescribed forms)	Fill in the necessary information on each form. If any changes occur to the information such as a change of address after submission, please inform the department as soon as possible.

## **(2) Academic achievement test**

An academic achievement test on the area of specialization and a language test will be conducted using the submitted summary of the applicant's master's thesis, research plan, or similar as reference. However, students who have published academic papers in non-Japanese languages may be exempted from attending the language test depending on the results of document screening.

If you want to be exempted from attending the language test, please consult with your prospective primary supervisor.

## **(3) Date and location of the academic achievement test**

Date: Friday, February 6, 2026

Location: Koganei Campus, Tokyo University of Agriculture and Technology

Further information about the location and other details will be given separately to each applicant.

## **7. Announcement of Successful Applicants**

A list of successful applicants will be posted at 10 a.m. on Thursday, February 26, 2026 on the TUAT website for 3 days.

A letter of acceptance and admission procedure documents will be sent to each successful applicant by post.

## **8. Admission Procedure**

### **(1) Time, date, and location**

Date: Monday, March 16, 2026

\* Details will be provided separately.

## **(2) Fees to be paid on admission**

① Admission fee: 282,000 yen

\* Students in master's programs of the Tokyo University of Agriculture and Technology who are continuing their studies in the university and Minister of Education, Culture, Sports, Science and Technology(MEXT) Scholarship Student, are exempted from this fee.

② Tuition fee: an annual amount of 642,960 yen (321,480 yen for the first semester and 321,480 yen for the second semester)

If the fee is changed while you are in this department, the new tuition fee may apply from the time the change was made.

When you entrance, you need to prepare expenses, for example, accident insurance designated.

## **(3) Necessary documents**

Students who are enrolling in the department without leaving their work are required to submit an Approval of Admission (prescribed form) completed by their immediate manager. Those who are in another graduate school are required to submit a "certificate of leaving." If they fail to submit these documents, their admission may be cancelled.

## **(4) Others**

Applicants who need special care due to disability (Prescribed in Article 22-3 of School Education Act), consult with a prospective supervisor and Admission Section, Koganei Student Support Office as soon as possible, before you apply.

## **9. Important Reminders**

(1) Be sure to contact the faculty member that you would like to become your primary supervisor in advance of application.

(2) Make sure that you bring your Examination Admission Card with you when attending the academic achievement test.

(3) You are not allowed to make any changes to submitted documents once the application procedure has been completed.

(4) If you do not observe the directions given in the Student Application Requirements (this document) or by the university, you may not be allowed to take part in the entrance examinations.

(5) For inquiries regarding the entrance examinations, use the contact information provided on page 5.

- (6) More information on the entrance examinations will be provided at the time of application.
- (7) Your examination fee will not be refunded for any reason once payment has been made.
- (8) Any change to the entrance examinations will be immediately communicated to each applicant.
- (9) Based on Foreign Exchange and Foreign Trade Act, Tokyo University of Agriculture and Technology has established “Tokyo University of Agriculture and Technology Security Export Control” to conduct strict screening of prospective students to be admitted into TUAT.

In case a prospective student or the contents of his/her studies/research is subject to regulation as defined by the above-mentioned Act or Regulations, TUAT must apply to the Ministry of Economy, Trade and Industry (METI) of Japan for its permission to allow his/her enrollment in TUAT, and s/he may not be able to begin his/her studies or research immediately at TUAT for the time being.

Furthermore, in case METI denies a TUAT’s application in order to maintain international peace and security, the prospective student may not be able to pursue his/her studies or research at TUAT as a result.

- (10) In case a disaster occur the before day of examination or the examination day, you check follow address.

<https://www.tuat.ac.jp/NEWS/>

- (11) Personal information is handled in accordance with the "Act on the Protection of Personal Information" and the "TUAT Personal Information Protection Regulations".

1. Personal information provided in the application documents will be used for the purpose of admission selection (application processing and selection), announcement of acceptance, and admission procedure operations.
2. Test scores and other information used in the selection of applicants will be used to prepare materials for consideration of future methods of selecting applicants.
3. Personal information of enrolled students will be used to perform tasks related to academic affairs (student registration, academic guidance, etc.), student support (health management, tuition waiver/scholarship application, employment support, etc.), and tuition fee collection.
4. When information is used in the operations described in 1. through 3. above, some of the operations may be performed by contractors entrusted by the University. All or part of the personal information will be provided to the contractor to the extent necessary for the performance of the entrusted work.

## 10. List of Areas of Education and Research

Names of professors	Areas of education/research	
	Areas of specialty	Details
Tsuyoshi TANAKA, Professor	Biotechnology, Bioimage Informatics, Analytical Chemistry	I develop advanced technologies to produce high-value compounds from marine microorganisms through multi-omics and metabolic engineering. I also create cutting-edge diagnostic technologies for pathogenic microorganisms and cancer biomarkers using bioimage informatics.
Hideyuki TANAKA, Professor	Human Movement Science, Motor Behavior	We conduct motor behavioral research on the human perception, cognition, and motor control mechanisms at a whole body level. We also develop support technologies for promoting physical fitness and health, and conduct applied research using existing technologies.
Hiroko TABUNOKI, Professor	Biochemistry, Molecular biology, Entomology	Intercomplementary research on insects and humans. Analyzing the molecular mechanisms of human diseases that are difficult to analyze in mammalian model animals using insects that have a unique character. Search for medical drug candidate's plant-derived ingredients in which biological activity has changed through insect-specific metabolism.
Tadashi YOSHIDA, Professor	Food Chemistry, Food Immunology, Food Functions	The aim of our research is to utilize the beneficial functions of food factors for preventing and alleviating various diseases, focusing on their immune-regulating activity. Particularly, allergy and life-style related diseases are important objects. We also aim to improve the functions by chemical modification of the factors.
Eriko SUZUKI Professor	Drug discovery and medicinal chemistry, Oncology, Chemical biology	We are searching for natural bioactive compounds that exhibit useful physiological activities such as anti-inflammatory and anti-thrombogenic activities, and analyzing their mechanisms of action in order to develop new drugs. We are also studying the regulatory mechanisms of differentiation, proliferation, and mitotic patterns of cancer stem cells (CSCs), involved in cancer metastasis and recurrence.

Masaki INADA, Professor	Biotechnology and Life Science, Pathophysiology, Dentistry	Scientific approaches on elucidation of life-style related disease mechanisms, the using disease models on mice and gene targeting methods were based on molecular cell biology. Improvement of the technical precision of drug screening systems on mice that conducts to contribute on novel drug developments.
Kosuke KATAOKA, Associate Professor *1	Bioinformatics, Insect Science, Neuroscience	Our research focuses on the mechanisms of diversity and environmental adaptation in animals, particularly insects, through multi-omics analysis and behavioral analysis using deep learning. Additionally, we explore the functional properties of novel food sources, particularly crickets, and conduct applied research aimed at building sustainable food production systems.

If you choice a supervisor with the \* 1 mark supervisor, refer to section A on p.5.

## **Approval of application qualifications (7) and (8)**

There are cases in which applicants are required to have their application qualifications approved by the Graduate School of Bio-Applications and Systems Engineering. The aim of the process is to judge whether the applicant is eligible to apply to the graduate school, and will be implemented as described below.

When this is the case, you need to contact your prospective primary supervisor in advance of the application and gain his/her consent.

### **1. When and where to submit your application documents**

Period: Monday, December 15 –Tuesday, December 16, 2025

Hours: 9:30 a.m. – 11:30 a.m., 1:30 p.m. – 4:00 p.m.

Location: Admissions Section, Koganei Student Support Office, Tokyo University of Agriculture and Technology

1F, Administration Building, Koganei Campus, Tokyo University of Agriculture and Technology

If you are unable to submit your documents in person and send them by post, write “Enclosing application eligibility documents for the joint department” on the address side of the envelope in red, and send it to the Admissions Section, Koganei Student Support Office by registered express mail. Only documents that have arrived no later than Tuesday, December 16, 2025, will be accepted.

### **2. Documents for submission**

(1) Application for Approval of Admission Eligibility (prescribed form)

(2) Certificate of (expected) completion (issued by the principal of your last school)

(3) Your transcript (created and tightly sealed by the principal of your last school)

Applicants who graduated from their last school 10 years ago or earlier do not need to submit their transcripts.

(4) Reasons for Application (prescribed form)

Develop a summary of your reasons for application of up to 2,000 Japanese characters (or 500 English words).

(5) List of your past research achievements and separate related sheets

Draw up and submit a list of your past research achievements (academic papers, research presentations, reports, patents, etc.).

The list should be accompanied by separate sheets related to your achievements or copies of these, when possible.

(6) Proof of employment (enrollment) (in any form)

Submit proof of your employment (enrollment), which must be created by your managers and state the details of your job roles and periods of tenure for your major work experiences.

\* Applicants who do not have any work experience are exempted from this requirement.

(7) Contact Information Stickers (prescribed forms)

Fill in the necessary information on each form. If any changes occur to the information such as a change of address after submission, please inform the department as soon as possible.

(8) If your eligibility to apply is due only to having completed (or expecting to complete) a six-year undergraduate program or equivalent in the field of medicine, dentistry, pharmacy, or veterinary medicine, create a summary of your graduation thesis of up to 2,000 Japanese characters (or 500 English words), in A4 format, by referring to the prescribed form “Outline of Master’s Thesis,” and submit this summary. If you have separate sheets related to your graduation thesis or copies of these, attach them as well.

\* If your undergraduate program did not involve creation of a graduation thesis, you may be separately required to submit other documents. When this is the case, be sure to ask your prospective primary supervisor in advance and observe his/her directions.

### **3. Examination for approval**

The Graduate School of Bio-Applications and Systems Engineering will examine applicants through document screening, interviews, and other such processes.

### **4. Results**

Results will be sent to each applicant by postal mail on Thursday, January 8, 2026.

### **5. Application procedure**

In general, once you have received approval of application eligibility, you must follow the same application procedure as for applicants for the entrance examinations.

You don’t have to submit documents you have already submitted.
