

Oo

Q1. What are the problems?

In Fukushima, the biggest problem is radioactive pollution

Q2. What are the hopes?

The hopes of local peoples are that they want to live their houses and want to continue their business as before. They want Fukushima with no nuke.

Q3. What are the lessons for you?

Local people's spirit and mind set that they fight back and continue their agriculture under difficult conditions

Q4. What can you (or do you want to) do?

We can participate activities and do research concerning with the reduction of Cs content in agricultural product and removal of Cs from agricultural land by collaborating with research team.

We can listen local people's voice and share their feeling and find the way to solve their problems together with them.
