

```

Public Sub ifsent()

    Dim H, W As Single
    Dim A, B As Single

    H = InputBox("Please Input Height[cm]?")
    W = InputBox("Please Input Weight[kg]?")

    A = (H - 95) * 0.82
    B = (H - 95) * 1.1

    MsgBox "A=" & A & " W=" & W & " B=" & B

    If W < A Then
        MsgBox ("Your Body is SLIM")
    Else
        If B < W Then
            MsgBox ("Your Body is BIG")
        Else
            MsgBox ("Your Body is NORMAL")
        End If
    End If

End Sub

```

「ElseIf」文を使う方法もある。

```

If W < A Then
    MsgBox ("Your Body is SLIM")

ElseIf B < W Then
    MsgBox ("Your Body is BIG")

Else
    MsgBox ("Your Body is NORMAL")

End If

```
